

Practical Information – ABS World Conference 2018

- Sessions last for 1.5 hours and are most likely to include the presentations of four speakers. The conference organising team suggests that each paper presenter limit the length of his or her speech to 15 minutes. This will allow the discussant to offer a commentary of about 10 minutes, after which there will be either a Q&A session or a discussion between the presenters and the audience to complete the session. Individual panel organisers may suggest another time schedule. Please contact your panel organiser in order to find out about his or her expectations.
- All conference rooms are equipped with computers. Please bring your PowerPoint Presentations with you on a USB stick, and upload your presentations on the computer in the conference room before your speech. Please do not use your own computer.
- It is not possible to upload a full version of your conference paper to the conference website. If you want to share your paper with the other paper presenters in your session, please ask your panel organiser to send it around.
